Equinix LD4

Vissensa houses its main financial services platforms at Equinix Slough Campus comprising of three data centres with over 100,000 square feet of colocation space offering the highest levels of network connectivity and latency.

Designed to be highly resilient and energy efficient with 100% renewable energy and 2N power infrastructure. The Equinix Campus operates one of the country's leading metro networks and as a result houses some of the UK and Europe's most critical platforms.

All of the Equinix slough facilities offer the highest levels of resilience and security and hold a number of certifications including; ISO9001:2008, ISO27001:2005, ISO50001:2011, SSAE16, PCI-DSS, OHSAS 18001.

Security

As a global data centre provider; Equinix deployments benefit from the highest levels of security and connectivity.

- ▶ 24/7 directly employed on-site security
- ▶ Physical man trap and biometric entry system
- ▶ CCTV and recorders, external and internal
- ▶ Secure deployments – caging to private suite

Connectivity

- ▶ Metro network connections to all major carriers
- ▶ Amazon, Azure and software direct connects
- ▶ Ultra-low latency
- ▶ Complete resilient diverse network transits

Datum Datacentres

Vissensa was one of the anchor clients at Datum Cody Park, due to the fact it could offer our clients significant security levels. Based on the highly secure Technology Park Campus, Vissensa can offer its clients a robust data centre with added peace of mind when it comes to security.

State-of-the-Art data centre with good connectivity, 100% uptime through 2N power infrastructure, and a large power reserve providing the flexibility and space for more than 1,000 cages or colocation racks.

The design of the facility meets the highest PUE energy efficient standards and has enviable power density, resiliency and security credentials including; ISO9001:2008, ISO27001:2005, ISO50001:2011, PCI-DSS.

Security

Leading data centre outside of London, Datum provides access to a high specification facility which includes:

- ▶ Highly secure campus with manned perimeter security
- ▶ 24/7 onsite security and access procedures
- ▶ 3 factor access control including biometrics
- ▶ Secure cage deployments

Flexibility

- ▶ Generous power allocation racks
- ▶ Flexible deployment methods – colo, cage, suite
- ▶ Major diverse carrier connectivity
- ▶ Highly efficient cooling protects server life and warranties

FULL RACK COLOCATION

Vissensa's Full Rack Colocation Services offer the perfect environment for medium and enterprise sized businesses, offering the highest specification colo, cage or suite deployment with the assurance of space, power and cooling infrastructure being available to fit your IT equipment.

- ▶ Dedicated rack in some of the UK's most sought after facilities, allowing you the flexibility to use as you wish with varying power requirements
- ▶ We understand how detrimental downtime can be to your business which is why we ensure we provide the best service to our clients - tier 1 banks trust us
- ▶ Focus on what matter most - your business
- ▶ Reduce costs compared to running internally
- ▶ Significant 99.999% data centre uptime
- ▶ Remote and onsite support available if needed
- ▶ Variety of network carrier available

Great platform to grow & save

If you're thinking of the idea of colocation a quarter rack is a great starting point, as you take on more space with us we can help to reduce your CAPEX on data centre spend internally - freeing up costs that can be used elsewhere.

Global colocation scope

At Vissensa we have relationships with not only UK but global data centre providers, which allows us to work with you to deploy your equipment and services where you need it to be.

HALF RACK COLOCATION

Vissensa's Half Rack Colocation Services offer a flexible environment for organisations looking to locate new project requirements or re-deploy some of their IT equipment for disaster recovery purposes.

- ▶ Providing up to 22U's worth of space in the rack
- ▶ Power availability from 2 amps to 8 amps
- ▶ Remote or onsite support services available if needed
- ▶ Flexible escorted access to the rack
- ▶ Reduce costs compared to running internally
- ▶ Unparalleled network connectivity
- ▶ Significant uptime guarantees
- ▶ Multi-site data centre deployments

Boost business performance & reduce costs

Running your IT onsite is often a costly option that becomes inflexible and doesn't give the security, flexibility or resilience that the business needs, which is why Vissensa can offer you the best alternative to enable you to focus on your business objectives.

Avoid downtime running equipment internally

With Vissensa's colocation services we provide a secure and reliable environment to help ensure your business continues to run all the time with 99.999% uptime in our data centres. We will fit your preference on either using it as your primary facility or as disaster recovery/backup facility.

QUARTER RACK COLOCATION

Vissensa's Quarter Rack Colocation is perfect for entry level colocation service to small or medium sized businesses looking for a secure offsite data centre.

- ▶ Reduce CAPEX on data centre spend
- ▶ Take advantage of high levels of resilience and connectivity
- ▶ Multi-site data centre deployments available
- ▶ 11U's worth of space available to use as you wish
- ▶ Vissensa's managed support services available depending on your need
- ▶ Flexible escorted access to the rack
- ▶ Includes one hour of remote hand service each month, additional hours available if required

Simple, secure and flexible

Operating your infrastructure as a private cloud in one of Vissensa's secure data centres is easier than you think and can give you the additional benefits of total flexibility, connectivity to public cloud networks and access to Vissensa's experienced technical team. We have been deploying private clouds for clients from tier one banks to SME's.

Continue to operate nationally or globally

Whatever your business model or markets, Vissensa can ensure you will continue to run as normal providing your services either within the UK or around the world.
